NIH- National Institute of Allergy and Infectious Disease ⁴	\$4.906 b	\$3.783 b	(-\$1.123 b)	(-22.9%)

¹The President's Budget contained FY17 funding numbers assuming that the levels contained in the Continuing Resolution would be for the full fiscal year; as a result, the FY17 numbers contained were not accurate as final FY17 funding levels. This column contains the funding levels passed by Congress as final FY17 funding in the FY17 Omnibus.

²Includes funding for the Division of Adolescent and School Health (DASH).

³This number is from the FY2017 Annualized CR and will be updated once FY2017 Omnibus figures for AIDS Research have been released.

⁴The National Institute of Allergy and Infectious Disease conducts clinical research on STDs. NCS D is doing additional research into what level of funding is allocated to STD-specific research from this Institute.
